HEDGE PLANTS—ALPINE Currant, BARBERRY, BUCKTHORN, DWARF NINE-BARK, HONEYSUCKLE and PRIVET—Amurensis and Lodense. We have well branched plants from 12 inches to 4 feet in size. Plants to fill in your hedge and for new plantings. Write for prices as to size and quantity.

EVERGREENS

Evergreens lend an elegance, richness and beauty to the home grounds that deciduous trees do not give. The year round they give life and beauty to the landscape and a touch to the surroundings that increases in value as time goes on.

We can supply well shaped specimen trees in all varieties and sizes: ARBOR VITAE, FIR, HEMLOCK, JUNIPER, LARCH, PINE, SPRUCE and YEW.

There is a type of evergreen for every purpose and location,—accent plant, foundation or group plantings and lawn specimens. Junipers and Yews are especially adaptable for foundation uses; Spruce and Pine make excellent lawn specimens. The Japanese Yew is an excellent evergreen for Wisconsin climates; very dark green foliage, many forms including tall pyramidal, spreading and dwarf types.

If possible visit the nursery and select recommended varieties as they appeal to you and fit the place to be planted.

Write for special price list.

ROSES

HYBRID PERPETUAL VARIETIES—\$.65 except as noted

	Each
AMERICAN BEAUTY—Deep pink	J. B. CLARK—Large, deep scarlet
